Professional Summary

Objective: Results-driven IT professional with 6+ years in Middleware and Systems Administration, now specializing in DevOps practices. Skilled in cloud infrastructure (AWS, Azure), CI/CD pipelines, and Kubernetes orchestration. Eager to contribute to scalable automation and high-availability solutions in fast-paced DevOps teams.

Technical Skills

Technologies: Cloud Computing (AWS, AZURE), CI/CD(Jenkins, Azure CI/CD, Github Actions), GIT, Terraform, Kubernetes, Docker, AKS, EKS, ArgoCD, Prometheus, Grafana, Azure Monitor, EFK

Operating Systems: Linux, Windows

Languages: Bash,Python,SQL

Experience

FIS Solutions Pvt Ltd

August 2023 – Present

Service Delivery Analyst

Pune, Maharashtra

- Engineered robust CI/CD pipelines using Jenkins and GitHub Actions, reducing manual deployment interventions by 40% and accelerating release cycles from weekly to daily.
- Wrote and optimized multi-stage Dockerfiles to make application images smaller and more secure, managing them in private registries like ACR and ECR
- Used Terraform to define and manage our AWS infrastructure (VPC, EC2, S3) as code, with a focus on creating reusable modules for different projects.
- Maintained the team's Git branching strategy (GitFlow) and helped manage the pull request and code review process to ensure we were shipping quality code.
- Deployed Prometheus, Grafana, and the EFK stack for monitoring and log analytics, reducing Mean Time to Resolution (MTTR) by 30%

SpanIdea Systems Pvt Ltd

November 2021 – August 2023

System Engineer (contract employee for FIS)

Bangalore, Karnataka

- Delivered ITIL-compliant service support across FIS apps—incident/change/problem management.
- Monitored scheduler jobs, resolved stuck files, and supported weekend patching activities.
- Led internal calls to define and improve standardized problem management practices across technical teams

ESDS Solutions Pvt Ltd

April 2019 – November 2021

Junior Technical Associate

Nashik, Maharashtra

- Administered Windows Server 2008–2019, including patching, VMware, and antivirus configuration.
- Handled IIS, DNS/DHCP, SSL, and supported web apps (Plesk, WebsitePanel) with end-to-end website, database, and email migrations
- Ensured high availability, system uptime, and secure operations across on-prem and hosted infrastructures

Projects and Certifications

Automated AWS Network Infrastructure | Terraform, AWS

- Designed and provisioned a secure Virtual Private Cloud (VPC) architecture using Terraform IaC modules.
- Configured Public Subnets, Route Tables, and IGs to establish secure external connectivity while maintaining network isolation

Secure Secrets Management Architecture | Azure, Terraform

- Integrated Azure Key Vault with Kubernetes (AKS) to centralize the management of container registry secrets and environment variables
- Eliminated hard-coded creds, ensuring Zero Trust security compliance and simplifying secret rotation processes.

Advanced End-to-End Kubernetes Three-Tier E-Commerce Project | Jenkins,EKS

- Automated CI/CD for 3 Tier E-commerce App using Jenkins, EKS, Docker, Kubernetes, Terraform, Argo CD.
- Implemented GitHub triggers and used Terraform for infrastructure provisioning.

Certifications

- AZ-900 Azure Fundamentals
