AZURE INFRASTRUCTURE LEAD | WINDOWS & VMWARE SPECIALIST | DEVOPS

PROFILE SUMMARY

Immediate Joiner with 6+ years of IT experience, offering a rare blend of traditional infrastructure expertise (**Windows Server, VMware**) and modern cloud operations (**Azure, DevOps**). Proven track record in bridging the gap between on-premise virtualization and cloud-native environments. Expert in managing high-availability SaaS environments, reducing Mean Time to Resolution (MTTR) by 30%, and leading incident management initiatives. Seeking to leverage deep expertise in Windows Administration and Azure Architecture as a Lead Engineer.

CORE COMPETENCIES

Windows Server (2008–2019) | VMware vSphere/ESXi | Hyper-V | DNS/DHCP | IIS Administration | Microsoft Azure | AWS | Azure Active Directory | Azure Monitor | Terraform (IaC) | PowerShell Scripting | Bash | CI/CD (GitHub Actions, Jenkins) | Incident Management (ITIL) | Root Cause Analysis (RCA) | Release Management | Team Leadership | Prometheus | Grafana | ELK Stack

WORK EXPERIENCE

Aug 2023 - Dec 2025 | FIS Global | Service Delivery Analyst

- Owned the end-to-end lifecycle of Production and Non-Production environments on **Azure**, ensuring 99.9% uptime for critical SaaS applications.
- Utilized **Terraform** to automate infrastructure provisioning, ensuring configuration consistency and minimizing drift across cloud resources.
- Implemented a robust observability platform using **Prometheus and Grafana**, defining SLIs/SLOs to track system health, which successfully reduced incident **MTTR by 30%**.
- Managed daily release cycles using Jenkins and GitHub Actions, coordinating between R&D and Operations teams to automate build/deploy workflows, reducing manual effort by 40%.
- Enforced security best practices by implementing environment isolation, Azure Container Registry (ACR) management, and automated vulnerability scanning

Nov 2021 – Aug 2023 | Spanldea Systems Pvt. Ltd. | System Engineer (contract employee for FIS)

- Delivered ITIL-compliant application support across FIS platforms, managing incidents, changes, and problem resolution while monitoring scheduler jobs, resolving stuck file processes, and supporting weekend patching activities to ensure service stability.
- Led cross-team problem management initiatives, facilitating internal technical discussions to standardize root-cause analysis practices and improve incident prevention and operational efficiency.

Apr 2019 – Nov 2021 | ESDS Solutions Pvt. Ltd. | Junior Technical Associate

- Administered and optimized **Windows Server environments (2008–2019)**, managing Active Directory, DNS/DHCP, SSL, and IIS web hosting platforms for high-traffic clients.
- Managed **VMware** virtualization infrastructure, performing VM provisioning, snapshots, resource allocation, and antivirus hardening to ensure high availability. Executed end-to-end website, database, and email migrations, ensuring security and operational stability across on-premises and hosted infrastructures
- Managed web hosting platforms including Plesk and WebsitePanel, troubleshooting complex server-side issues

PROJECT DETAILS

Automated AWS Network Infrastructure | Terraform, AWS

- Architected and provisioned a secure, scalable VPC using Terraform-based Infrastructure as Code (IaC) modules.
- Configured public subnets, route tables, and Internet Gateways to enable secure external access while preserving network isolation and security best practices.

Secure Secrets Management Architecture | Azure, Terraform, AKS

- Designed and implemented centralized secrets management by integrating Azure Key Vault with Azure Kubernetes Service (AKS).
- Eliminated hard-coded credentials, enforcing Zero Trust security principles and streamlining secret rotation and compliance.

End-to-End Kubernetes Three-Tier E-Commerce Platform | Jenkins, EKS, Terraform, Argo CD

- Delivered an automated CI/CD pipeline for a three-tier e-comm application using Jenkins, Docker, Kubernetes (EKS), and Terraform.
- Implemented GitHub-based triggers, infrastructure provisioning via Terraform, and GitOps-driven deployments using Argo CD for consistent, scalable releases.
